Date: August 2022

Subject: Explanation on the operation of Makedonski Telekom AD - Skopje for the period from 01.01.2022 until 30.06.2022

The following analysis refers to the Unaudited Financial Statements of Makedonski Telekom (MKT) for the period 01.01.2022 - 30.06.2022, prepared in accordance with the International Financial Reporting Standards (IFRSs).

I Revenues

The sales revenues in the first six months of 2022 amounted to MKD 5,872,399 thousand, which represents increase of 8.9% compared to the same period of the previous year.

Mobile services

Mobile voice and non-voice services

On the mobile market, MKT has a **market share of 48.4%** (internal estimation, compared to the 47.7% at the end of the same period of the previous year). The subscribers' base at the end of the first six months of 2022 amounts to 1,233 thousand subscribers and it is increased by 12.2% compared to the same period of the previous year.

At the end of the first six months of 2022, the revenues from **mobile retail voice and mobile non-voice services** marked an increase by 8% compared to the same period of the previous year.

The increase is mainly due to the higher number of post-paid subscribers, as well as increase of the roaming revenues due to reduction of the restrictions related to COVID – 19 pandemics, and on the other hand there is decline of the revenues from pre-paid mostly due to pre to post migration as well as the lower spending of voice services in the pre-paid segment. There is increase of the revenues from non-voice services mostly as a result of the increased revenues from mobile internet due to higher usage of bundled tariff models with non-voice services as well as the increased GPRS traffic in roaming.

The revenues from wholesale voice services at the end of the first six months of 2022 marked a decrease by 9.5% compared to the same period of the previous year.

The blended ARPU (Average Revenue Per User) for voice and nonvoice services marked a decrease by 4.6% compared to the same period of the previous year amounting to MKD 372 mostly driven by the lower spending of voice services in the pre-paid segment.

Fixed services

Fixed voice and non-voice services

MKT has managed to maintain the **leading position on the fixed voice market with 62.2%** (internal estimation and it is slightly decreased compared to 62.3% at the end of the same period of the previous year) or 225 thousand customers at the end of the first six months of 2022.

The voice retail revenues in the first six months of 2022 in the fixed segment services have decreased by 1.4% compared to the same period of the previous year due to decreased outgoing traffic by 21.6%.. At the end of the first six months of 2022 the number of customers in the fix voice (including the customers using the convergent services) marked an increase by 1.1% compared to the same period of the previous year.

At the end of the first six months of 2022, **the number of total BB accesses** (including the customers using the convergent services) is increased by 3.1% and amounts 223.6 thousand compared to 216.9 thousand at the end of the same period of the previous year. **The number of BB subscribers (excluding wholesale)** at the end of the first six months of 2022 has increased by 3.3% and amounts 200.6 thousand compared to 194.1 thousand at the end of the same period of the previous year. The **broadband Internet market share** at the end of the first six months of 2022 **amounts to 48.9%** (internal estimation, compared to 49.5% at the end of the same period of the previous year). The investments in the optic network have resulted in a continuous increase of the number of accesses to the optic network in the country. At the end of the first six months of 2022 Makedonski Telekom has enabled more than 260 thousand accesses to the optic network which is an increase by 12% compared to the same period of the previous year.

Regarding the **TV market**, MKT has a leading position with **market share of 34.1%** (internal estimation, compared to 34.4% at the end of the same period of the previous year) of the total TV market. The IPTV (digital television via Internet protocol) service, with its high quality, interactivity and the unique TV experience, is excellently accepted on the market and MKT at the end of the first six months of 2022 achieved an increase of the number of IPTV customers (including Magenta1, 3 Play and other TV services) by 1.7% compared to the same period of the previous year, which has resulted in a customer base of 147 thousand customers at the end of the first six months of 2022.

The **revenues from retail Internet** at the end of the first six months of 2022 have increased by 1.1% compared to the same period of the previous year.

The **revenues from digital television via Internet protocol ("IPTV")** at the end of the first six months of 2022 have increased by 3.7% compared to the same period of the previous year.

Other revenues

Other revenues in the fixed and mobile segment

System integration and IT revenues at the end of the first six months of 2022 have increased by 163.1% compared to the same period of the previous year as a result of higher revenues from ICT projects, mainly resulting from the Project for Smart Lighting and Platform for digital city.

MAKEDONSKI TELEKOM AD - SKOPJE
Kej 13 Noemvri No. 6, 1000 Skopje, R. North Makedonija

The revenues from the sale of equipment at the end of the first six months of 2022 have increased by 10.5% compared to the same period of the same period of the previous year as a result of the increase of revenues from sale of handsets due to higher average sale price supported by the effect from allocation of revenues in accordance with the IFRS 15.

II Expenses

Operating expenses

On the cost side, at the end of the first six months of 2022, the operating expenses marked an increase by 13.6% compared to the same period of the previous year, mostly as a result of the increase of the cost of trading goods sold, cost of consumed materials and other supplies and cost for depreciation and amortization.

The employee related expenses have slightly decreased by 0.1% at the end of the first six months of 2022 compared to the same period of the previous year.

The cost of trading goods sold is increased by 44% in line with the increased sales revenues, while the cost of consumed materials and other supplies are increased by 115.9% at the end of the first six months of 2022 compared to the same period of the previous year, dominantly due to increase of the electrical energy price as a result of the global movements of the electrical energy price.

The cost for services is decreased by 5.2% at the end of the first six months of 2022 compared to the same period of the previous year.

The cost for depreciation and amortization at the end of the first six months of 2022 marked an increase by 10% compared to the same period of the previous year.

Capital expenditures

The amount of total Capital expenditures (CAPEX), at the end of the first six months of 2022 is MKD 1,389,962 thousand.

III Operating and Net profit

The above-stated movements of the revenues and costs resulted in slight increase of the Earnings before interest, taxation, depreciation and amortization (EBITDA) in the first six months of 2022 by 1.3% compared to the same period of the previous year. However, as a result of the global economic trends and the significant increase of the electrical energy price the EBITDA margin for the first six months of 2022 has declined and amounts 39.6% compared to 42.7% at the end of the same period of the previous year.

Operating profit (Earnings before interest and taxation - EBIT) for the first six months of 2022 is decreased by 10.2% compared to the same period of the previous year.

MAKEDONSKI TELEKOM AD - SKOPJE
Kej 13 Noemvri No. 6, 1000 Skopje, R. North Makedonija

As a result of the above-stated movements of the revenues and costs as well as the financial incomes and expenses the Net profit for the first six months of 2022 has declined by 12.4% compared to the same period of the previous year and amounts MKD 776,362 thousand.

<i>In MKD thousands</i>	<i>2021 Jan - Jun</i>	<i>2022 Jan - Jun</i>	<i>Change YoY</i>
Total Operating revenues	5.432.367	5.932.884	9,2%
Sales revenues	5.391.016	5.872.399	8,9%

IV Paid dividends

The Shareholders' Assembly of MKT, at its meeting, held on 31 May 2022 adopted a Resolution for the dividend payment for the year 2021 and determination of the dividend calendar. In accordance with this Resolution the dividend for 2021 is in total gross amount of MKD 1,721,980 thousand.

The gross amount of dividend per share for 2021 is MKD 19.96 which is increase by 24.6% compared to the dividend for 2020 (MKD 16.02). The dividend payment shall commence as of 15 August 2022.

V Plan and expectations for the next period

The trend of positive results achievement continues in the first half of 2022 as well. Our permanent orientation towards the customers and their needs has resulted in growth of the customers' base, and by that growth of the revenues and the direct margin.

Increased revenues mainly come from the growth in the mobile services as well as the part of the ICT services.

These positive results are prerequisites for further continuing of the Strategy for overall orientation towards customers and being leader in the digitalization. Obtaining of the 5G radio frequencies is a possibility for

MAKEDONSKI TELEKOM AD - SKOPJE
Kej 13 Noemvri No. 6, 1000 Skopje, R. North Makedonija

additional services, products and new functionalities, with which we shall be a step closer towards the achievement of the Company's goals.

VI Effect from COVID – 19 and war in Ukraine

In 2020, the coronavirus spread globally, and its negative impact continues to affect entities across the world. In the course of 2021 and additionally in 2022 some recovery has been already visible which has resulted in local easement of the restrictive measures as well as increased mobility of the people across the borders.

The management closely monitors the impact of the pandemic on the operations and provides further updates to the stakeholders as the situation evolves. Furthermore, the management is in close communication with the local state institutions and remains compliant with official guidelines.

The Company responded to the COVID-19 situation swiftly. The Company continues to meet the increased demand for connectivity through its network and has not identified any events which could jeopardize the going concern of its operation.

Management paid particular attention to the solvency of customers due to COVID-19, however, based on experiences of last months and expectations considering the future COVID effects, there are no material effects on the impairment rates.

During 2021, the inflation rates has increased globally, which resulted in a local inflation rate (cumulative average) of 3.2% for 2021 (2020: 1.2%). In April and May 2022, the inflation is significantly increased and amounts to 8.4% and 9.1% respectfully, which is higher compared to the latest projections. The yearly inflation dynamics is reflection of the increase in food and energy prices as a result of the growth of import prices. Considering that food and energy are an input component in most of the products and services, the prices' growth is inevitable and affects the basic inflation movement. The expectations for the future dynamics of the import prices is in the upward direction, whereas the inflation projection is also in the upwards direction. The pressure on the prices mainly derive from the demand factors, correlated with the prices' change on the global markets, which is connected with the distortions on the energy market as well as the global chains supply. At the same time, in the conditions with significant oscillations in the movement of the international prices of the basic products, due to war in Ukraine and imposed sanctions towards Russia from the most of the countries in the world, their movement is hardly predictable and therefore the uncertainty related to the future prices' movement is outstandingly emphasized¹.

The global rise of energy cost will result in significant increase of the Company's energy costs in the next period as well, which will create pressure on the results achievement. The Management will put an effort, as much as possible, with a set of optimizing measures as well as better commercial results to compensate these negative trends.

Investigation into certain consultancy contracts

On 13 February 2006, Magyar Telekom Plc., the controlling owner of the Company, (via Stonebridge Communications AD - Skopje, majority shareholder of the Company), announced that it was investigating certain contracts entered into by another subsidiary of Magyar Telekom Plc. to determine whether the contracts were entered into in violation of Magyar Telekom Plc. policy or applicable law or regulation. Magyar Telekom's Audit Committee retained White & Case, as its independent legal counsel to conduct the internal investigation. Subsequent to this, on 19 February 2007, the Board of Directors of the Company, based on the recommendation of the Audit Committee of the Company and the Audit Committee of Magyar Telekom Plc., adopted a resolution to conduct an independent internal investigation regarding certain contracts in Republic of North Macedonia.

Based on publicly available information, as well as information obtained from Magyar Telekom and as previously disclosed, Magyar Telekom's Audit Committee conducted an internal investigation regarding certain contracts relating to the activities of Magyar Telekom and/or its affiliates in Montenegro and Republic of North Macedonia that totalled more than EUR 31 million. In particular, the internal investigation examined whether Magyar Telekom and/or its Montenegrin and Macedonian affiliates had made payments prohibited by U.S. laws or regulations, including the U.S. Foreign Corrupt Practices Act (the "FCPA"). The Company has previously disclosed the results of the internal investigation.

Magyar Telekom's Audit Committee informed the U.S. Department of Justice (the "DOJ") and the U.S. Securities and Exchange Commission (the "SEC") of the internal investigation. The DOJ and the SEC commenced investigations into the activities that were the subject of the internal investigation. On 29 December 2011, Magyar Telekom announced that it had entered into final settlements with the DOJ and the SEC to resolve the DOJ's and the SEC's investigations relating to Magyar Telekom. The settlements concluded the DOJ's and the SEC's investigations. Magyar Telekom disclosed the key terms of the settlements with the DOJ and the SEC on 29 December 2011. In particular, Magyar Telekom disclosed that it had entered into a two-year deferred prosecution agreement (the "DPA") with the DOJ. The DPA expired on 5 January 2014, and further to the DOJ's request filed in accordance with the DPA, the U.S. District Court for the Eastern District of Virginia dismissed the charges against Magyar Telekom on 5 February 2014.

In relation to the local investigation by the state authorities in Republic of North Macedonia and further to the previously disclosed information in the Financial Statements of the Company for the preceding years, the criminal procedure against former managers of the company is still ongoing at first instance criminal court.

We have not become aware of any information as a result of a request from any regulators or other external parties, other than the previously disclosed, from which we would have concluded that the financial statements may be misstated, including from the effects of a possible illegal act.
